Subject Fw: Draft Risk Assessment Document - Internal Deliberative Document

Hello,

Just a friendly reminder that your comments on the draft risk assessment document (below) for Subpart W are requested on or before January 18, 2011. If you have already responded, thank you. If not, please take a look at the document, as it is an important portion going forward in any revision of the Subpart W standard. Thanks again.

Reid

Subject: Draft Risk Assessment Document - Internal Deliberative Document

---

Hello All,

My apologies for being out of touch for so long. I have attached a draft risk estimates document from our contractor. This document is intended to provide risk estimates for each operating source of emissions regulated by Subpart W from the management of uranium byproduct materials from the processing of uranium ores. The estimates are presented on a facility-by-facility basis for all currently operating uranium recover facilities. We have also included risk estimates for several theoretical facilities that represent potential facilities on the east coast, or at least areas where precipitation is greater than evaporation.

I know it will be difficult to review this document within the next week or so. Therefore, I would appreciate it if you could provide comments to me by no later than Tuesday, January 18, 2011. After I have compiled the comments, we will have a workgroup meeting to discuss. Thanks for all your help, and Happy Holidays.

Reid
